Wider Eastern Information Stakeholder Forum

This Information Sharing Protocol is designed to ensure that information is shared in a way that is fair, transparent and in line with the rights and expectations of the people whose information you are sharing.

This protocol will help you to identify the issues you need to consider when deciding whether to share personal data. It should give you confidence to share personal data when it is appropriate to do so, but should also give you a clearer idea of when it is not acceptable to share data.

Specific benefits include:

- transparency for individuals whose data you wish to share as protocols are published here;
- minimised risk of breaking the law and consequent enforcement action by the Information Commissioner's Office (ICO) or other regulators;
- greater public trust and a better relationship by ensuring that legally required safeguards are in place and complied with;
- better protection for individuals when their data is shared;
- increased data sharing when this is necessary and beneficial;
- reduced reputational risk caused by the inappropriate or insecure sharing of personal data;
- a better understanding of when, or whether, it is acceptable to share information without people's knowledge or consent or in the face of objection; and reduced risk of questions, complaints and disputes about the way you share personal data.

Please ensure all sections of the template are fully completed with sufficient detail to provide assurance that the sharing is conducted lawfully, securely and ethically.
